Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Heidi Gillespie

Apr 20, 2013

South Carolina Public Service Commission

Dear Public Service Commission,

Duke has already begun a solar program in the Piedmont that has installed over 42,000 solar panels on 25 sites, with Duke owning the solar components and receiving the electricity. They pay rent to building owners and homeowners for the use of their roofs and land. If Duke can do this to accomplish their mandated 12.5% in renewable energy, they should not expect other customers to subsidize their investment in dirty, old energy like coal and nuclear. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

T Coulson
